SENIOR TECHNICAL CONSULTANT TECHNICAL CONSULTANT

Salesforce, Toronto (Remote)

<u>Senior Salesforce Developer (Jan 2023 – present)</u>

Client: American multinational digital communications technology conglomerate corporation.

<u>Salesforce Developer and Release Manager (Sep 2021 – Sep 2022)</u>

Client: Canadian not-for-profit music licensing company.

Responsibilities and achievements:

- Developed several custom Lightning Web Components that exchange data and files with MuleSoft APIs through Apex, and exposed them to two Experience Cloud sites.
- Supported the MuleSoft Architect by providing a Google sheet that lists a
 breakdown of fields' labels and API names, and provided SOQL queries for
 data integration and loads.
- Built a scheduled business process using Batch Apex and a custom runner that handled creating and updating records related to 300k+ Accounts.
- Interacted with the 3rd party vendor's professional services team to build, collaborate and test inbound and outbound integrations with Experience and Service Cloud.
- Collaborated with the MuleSoft Architect to optimize and resolve inbound and outbound integrations.
- Set Experience Cloud's external users' access to records and files via profiles, permission sets, and sharing sets.
- Customized the Salesforce org to add new objects, fields, and processes based on stakeholder requirements.
- Supported the client's Data Engineer with data loads into Salesforce and ran two weeks of training sessions for the client's SME on Service Cloud.
- Managed deployment to production using SFDX extension for VS Code and maintained our releases and sandboxes.
- Conducted discovery sessions with the client's SME to understand requirements, then created Jira stories and epics to manage scope and sprints.
- Helped four additional developers onboard to the project in less than a week and guided them throughout the implementation.
- Built a close rapport with the client's VPs of Technology and Distribution.

Extracurricular Activities

- Reviewed, contributed to, and maintained Salesforce's Professional Services global internal development standards and best practices.
- Contributed to 3 different Slack question and answer channels used by consultants and architects.

FULL STACK SALESFORCE DEVELOPER

EcoVadis, Toronto (Remote)

- Designed, built and maintained a survey-like tool on top of Sales Cloud, used by Success Managers, that includes 5 levels of parent-child relationships to store data, externally exposed it using Apex Web Service and a web-app, secured it using JWT, and visualized its results with interactive Chart.js graphs in a custom Lightning Web component.
- Increased users' productivity by automating business processes using
 Lightning Process Builder, Flows, Apex Trigger and other automation tools.
- Improved data quality by implementing Validation Rules and Apex Triggers and unit tested them with at least 90% code coverage.
- Helped derive business decisions by building Reports, Dashboards, Custom Report Types, and custom formulas.
- Mentored and supported team members by providing guidance and detailed steps on how to achieve the desired outcome.
- Identified gaps, areas for improvement and performance optimization with action items following **best practices**.
- Lead technical and solution designs and then discussed them with stakeholders and the enterprise architect to validate requirements and approaches.
- Initiated a weekly 15 minutes Lightning Talks to share Salesforce knowledge, best practices or interesting features we learned about, and created a Chatter group to publish releases and release notes.
- Guided agile transformation by introducing change management and processes, administered sprints, sprint planning, retrospectives, and standups, and then built CI/CD between sandboxes and Production org using Azure DevOps Repos, Pipelines and SFDX.
- Administered the org by importing and cleansing records using Data
 Loader or Data Import Wizard, identifying and giving the right
 user/object/field permissions, creating new users and other administrative
 tasks.
- Trained internal users on how to use Sales Cloud standard and custom features, and external consultants on how to use Azure DevOps and SFDX.
- Researched, planned and offered to lead an org spit project, inclusive of metadata and data migration, and a rollout strategy.

Nov 2017 - Apr 2020

APPLICATION DEVELOPER

NexJ Systems, Toronto

- Implemented features and fixed bugs using Scheme and JavaScript for NexJ's Customer Process Management System (CPM) based on Stakeholders' requirements.
- Integrated CPM with both NexJ's Enterprise Customer Relationship Management (CRM) and CRM for Wealth Management.
- Wrote unit tests to maintain quality and eliminate regressions.
- Helped Professional Services customize CPM to improve and enforce compliance based on clients' requirements.
- Developed Progress Calculation with an intuitive UI to improve User Experience and increase Financial Advisors' productivity.
- Performed code reviews and took initiative to develop coding standards to maintain code base quality and increase readability.

	 Administered our teams' Scrum and its processes. Documented features and bugs internally for each release to increase knowledge transfer. Integrated CPM with Salesforce's Sales Cloud by building REST APIs using
	Node.js that pushes data to Heroku 's PostgreSQL database, then retrieved them in Sales Cloud using Salesforce Connect. (Hackathon)
